# J2.2-3.5XN

2,200 - 3,500 KG

FOUR WHEEL ELECTRIC  
COUNTERBALANCE  
SERIES

## OVERVIEW

Designed for both indoor and outdoor use, the Hyster J2.2 – 3.5XN has all the benefits of an internal combustion truck with lower maintenance needs and no exhaust emissions.

## PRODUCT FEATURES

The Hyster J2.2 – 3.5XN series of forklifts features industry leading innovations that deliver what matters most:

Reliability, Dependability and Low cost of ownership

### 1 Overhead Guard

The unique grid-style pattern improves visibility while protecting operators and strengthening the truck's structure. The front, curved OHG leg design affords greater shoulder clearance for easier operator entry and exit.

### 2 Fatigue-Reducing Operator Compartment

Ergonomically designed operator compartment enhances overall productivity. Features include: increased foot space and optimised step height for easy entry and exit; fully adjustable, full suspension seat (optional) with low whole body vibration levels; infinitely adjustable steering column with optional memory tilt and telescopic steering wheel and low effort e-hydraulic controls. The standard non-suspension seat and optional suspension and swivel seats are all easily adjusted to provide a more customised, comfortable ride.

### 3 Multifunction Display

The location of the multifunction display provides maximum forward visibility and ease of operation. The display does not obstruct the forward view of the operator and is within easy reach of the operator, supervisor or service technician for quick access to truck functions, diagnostics and troubleshooting.

### 4 AC Motors

The brushless AC traction and hydraulic motors, powered by transistor controls, are durable enough to handle your toughest duty cycle, with reduced maintenance costs and enhanced productivity.

### 5 "Drop Battery Box"

The battery sits low in the frame resulting in a lower seating position, making entry and exit from the truck easier and maximising truck stability and capacity. The new stamped steel hood is designed for durability and protection.

### 6 "Zero Turn" Steer Axle

Features advanced turning capability to provide superb manoeuvrability during operation.

### 7 Pneumatic Tyres

The pneumatic tyres on the J2.2–3.5XN series reduce vibration to provide a smooth, comfortable ride, even over less than ideal surfaces.

### 8 LED Lights

Bright and long lasting, the optional LED front and rear working lights and brake/tail/back-up lights rarely need replacing. The plastic lens meets the FDA requirement for use in food applications.

**9 Exclusive VISTA® Mast**

High strength hot-rolled steel mast channels and flush-faced design improve capacity retention at high lifts. Compact cast steel cross members optimise visibility and rigidity. Six canted 3-inch full-face load rollers roll on the web and the flange simultaneously, eliminating the need for side thrust rollers or wear plugs.

**10 Hyster Stability Mechanism**

The new stability system reduces truck lean in turns, allowing superior travel over uneven surfaces. The stability system requires no maintenance.

**11 Tilt Steer Column**

The infinitely adjustable tilt steer column with optional telescopic column and tilt memory accommodates all operators easily. Assisted by a gas-spring and an easy-to-reach lever, obtaining your preferred position is simple.

**12 Hassle-Free Hydraulics**

Use of leak-free O-ring face seals helps maximise uptime. In-tank filter increases hydraulic fluid filtration by 60% for particles down to 10 microns, significantly extending component life by creating a cleaner overall operation.

**13 Pacesetter VSM™**

The computer “brain” of these lift trucks manages all vehicle systems to optimise performance, significantly increase overall reliability and enhance diagnostic capability to give maximum uptime.

**14 Removable Floor Plate**

Two-piece steel floor plate and side plates are easily removed to provide instant service access. A thick moulded rubber floor mat seals the floor area to reduce noise and vibration for a more comfortable ride.

**15 Integral Sideshift**

The optional Hyster-designed integral sideshift provides excellent visibility and affords greater capacities than carriage-mounted sideshifts.

**16 Heavy-duty Drive Axle**

The full floating design of the drive axle lets the axle housing, not the shafts, carry the weight of the load, enhancing dependability and reliability for a longer service life. Hyster premium oil-cooled wet disc brakes provide smooth stopping with reduced pedal effort as well as long brake life.

# J2.2-3.5XN

2,200 - 3,500 KG

FOUR WHEEL ELECTRIC  
COUNTERBALANCE  
SERIES

The Hyster J2.2 – 3.5XN series is available in 2 configurations – **Advance & Advance +**.

With enhanced performance characteristics, the Advance+ configuration has been designed to operate in intensive, high productivity applications with long runs and high lifts as an effective alternative to an engine-powered truck.

For example, in comparison to the Advance configuration, top speed (laden) has been increased to up to 21 km/h with faster acceleration, and lifting speeds have been increased by 27%.

## LOWER COST OF OWNERSHIP

Hyster keeps total operating costs low.

- ✓ Customisable performance settings allow energy efficiency to be ideally balanced with productivity delivering high throughput at lower operating cost.
- ✓ The Vehicle System Manager (VSM) allows adjustment of truck performance parameters and monitors key functions, leading to application matched performance and minimum downtime.
- ✓ Durable, quality components, including virtually maintenance free oil immersed brakes and brushless AC motors offer long term reliability and lower maintenance costs.
- ✓ In-built thermal protection on traction motors and advanced cooling system protect truck components, leading to reduced maintenance costs.
- ✓ Fast delivery of diagnostic information allows precise troubleshooting, easy maintenance planning and lower costs.

## DEPENDABILITY

Dependable Performance from Hyster.

- ✓ Robust mast design provides excellent visibility and reliable, high performance lifting.
- ✓ Strong chassis construction and reliable, long-lasting components deliver excellent durability and stability, increasing driver confidence and enhancing productivity.
- ✓ AC motor technology on traction and hoist, with built in thermal management system, allows the truck to work reliably over long runs and in demanding work cycles, reducing downtime significantly.
- ✓ The electrical system features a CANbus communications network and Hall Effect sensors for increased reliability.

COUNTERBALANCE  
SERIES

## ENHANCED PRODUCTIVITY & SUPERIOR ERGONOMICS

Dual 10 kW AC front wheel traction motors deliver smooth acceleration, fast travel and rapid direction changes. This is combined with regenerative braking and a powerful hoist motor to deliver efficient load handling in the toughest of applications.

### Productivity

- ✔ Designed to offer excellent manoeuvrability in working aisles, speeding up throughput, the forklift features a slim counterweight, Zero Turn Radius (ZTR) steer axle and dual drive motors.
- ✔ The maintenance-free mechanical Hyster Stability Mechanism (HSM) reduces truck lean when travelling over obstacles, increasing driver confidence and productivity.
- ✔ Extended battery shift life and easy side battery removal systems offer increased uptime with a fast, simple recharging process to keep trucks on the move.

### Ergonomics

- ✔ The ergonomically designed operator compartment provides a comfortable and highly productive environment for the driver. The truck offers industry leading floor space and easy on/off access is enhanced thanks to the low intermediate non-slip step (height = 475 mm).
- ✔ Low noise and whole body vibration combined with a new full suspension seat with 80mm suspension travel and a range of adjustments ensures the operator remains comfortable over long shifts.
- ✔ The fully adjustable tilt steering column with telescopic adjustment, memory tilt and synchronised steering options allows the operator to get on and off the truck quickly and easily throughout the shift, ensuring maximum comfort and increased productivity.
- ✔ The new mini-lever module armrest with built in hydraulic controls, integrated directional control, emergency off switch and horn offers the ultimate in comfort and control. Alternatively, seat-side manual levers also provide handling ease.
- ✔ A 'Heads-up' display keeps the driver's field of vision clear but provides him with 'at a glance' information on truck operating conditions or performance settings.
- ✔ A choice of weather protection options promotes a comfortable working environment, whatever the conditions.

## **SIMPLIFIED SERVICE**

Comprehensive support is provided by the extensive and experienced Hyster dealer network.

### **Superior Serviceability**

- ✓ Standard 1,000 hour service interval.
- ✓ Access to diagnostic information via the display or plug-in point on the steering column allows service technicians to monitor truck operations and plan maintenance requirements.
- ✓ Easily removable two-piece floor plate provides easy access to power contactor, traction controller fuses and relays.
- ✓ Motor, pump, controller and oil tank are located in the counterweight and are easily accessible, requiring only 2 thumb screws to be removed.
- ✓ Automatic park brake system can be released manually by activating lever arrangement underneath floor plates, reducing downtime.
- ✓ LED work lights are designed to last the lifetime of the truck.

# TRUCK DIMENSIONS

 = Centre of gravity of unladen truck

$$A_{st} = W_a + R + a \text{ (see lines 4.33 and 4.34)}$$

$$R = \sqrt{(l_6 + x)^2 + (b_{12} - b_{13})^2}$$

## Note:

Specifications are affected by the condition of the vehicle and how it is equipped, as well as the nature and condition of the operating area. If these specifications are critical, the proposed application should be discussed with your **Adaptalift Hyster** dealer.

-  Bottom of forks
-  Without load backrest
-  Full suspension seat (FLM80) specified. Compressed condition, add 40 mm for nominal position. Add 104 mm for battery side removal option
-  Add 28 mm with load backrest
-   $h_6$  subject to +/- 5 mm tolerance. Add 104 mm for battery side removal option
-  Stacking aisle width (lines 4.33 & 4.34) is based on the V.D.I. standard calculation as shown on illustration. The British Industrial Truck Association recommends the addition of 100 mm to the total clearance (dimension a) for extra operating margin at the rear of the truck.
-  Gradeability figures (lines 5.7 & 5.8) are provided for comparison of tractive performance, but are not intended to endorse the operation of the vehicle on the stated inclines. Follow instructions in the operating manual regarding operation on inclines.
-  Variable
-  Advance configuration, with eLo performance setting
-  Advance+ configuration with HiP performance setting
-  Lpaz, measured according to the test cycles and based on the weighting values contained in EN12053

## Tables key:

-  Add 666 mm with load backrest extension
-  Deduct 666 mm with load backrest extension
-  Add 684 mm with load backrest extension
-  Deduct 684 mm with load backrest extension
-  Add 583 mm with load backrest extension
-  Deduct 583 mm with load backrest extension
-  Add 601 mm with load backrest extension
-  Deduct 601 mm with load backrest extension
-  Wide tread required. Standard tread possible but with reduced capacity. Contact your **Adaptalift Hyster** Dealer.

## Notice

Care must be exercised when handling elevated loads. When the carriage and/or load is elevated, truck stability is reduced. It is important that mast tilt in either direction be kept to a minimum when loads are elevated. Operators must be trained and adhere to the instructions contained in the Operating Manual.

Hyster products are subject to change without notice. Forklifts illustrated may feature optional equipment.

## Safety:

This truck conforms to the current EU requirements and Australian ISO Standards.

The rated capacities shown are for masts in a vertical position on trucks equipped with standard or sideshift carriage and nominal length forks. Masts above the maximum fork heights shown in the mast table are classified as high lift and, depending on the tyre/tread configuration may require reduced capacity, restricted back tilt or wide tread.
